¹ Please refer to section 18 for additional information on IPV presentation.

² This is the entire duration of the Programme.

³ This is the total amount endorsed by Gavi for 2015 to 2018.

⁴ This is the consolidated amount for all previous years. Annual amounts prior to 2017 include the costs of injection safety devices. Annual amounts for 2017 onwards include only vaccine costs and freight.

11. Indicative Annual Amounts: (subject to the terms of the Partnership Framework Agreement, if applicable)⁵

Number of vaccines to be purchased with Gavi funds	2015-2018	2019
IPV Routine Programme (doses)		1,166,400
Annual Amounts (US\$)	1,101,768	US\$2,674,000

12. Procurement agency: UNICEF. The Country shall release its co-financing payments each year to UNICEF.

13. Self-procurement: Not applicable

14. Co-financing obligations: Not applicable
Gavi's usual co-financing requirements do not apply to IPV. However, Ghana is encouraged to contribute to vaccine and/or supply costs for IPV.

15. Operational support for catch-up campaigns: Not applicable

16. Additional reporting requirements:

Reports and information	Due dates
To prepare for the annual procurement of vaccines, Country shall submit the following information each year: <ul style="list-style-type: none"> vaccine stock levels including buffer stock, by end of March; number of children to be vaccinated, wastage rates, any proposed changes in product, presentation or use, or minimum co-financing levels and vaccines received, by mid-May. Countries shall report the actual switch date in the first renewal request following the actual implementation. 	31 March 2019 15 May 2019
In accordance with applicable Gavi processes, Country shall report on programmatic and financial performance.	To be agreed with Secretariat

17. Financial clarifications: Not applicable

⁵ This is the amount that Gavi has approved.

18. Other conditions:

Due to unprecedented demand for IPV and the challenges to scale up production capacities, the global IPV supply remains constrained and is unlikely to meet all country requirements in the short term. As a consequence, the actual presentation and number of doses shipped may differ from those specified in this Decision Letter. In order to mitigate these circumstances, you are strongly encouraged to optimally manage available supply and follow recommendations and guidelines from WHO and UNICEF to reduce vaccine wastage.

If Ghana envisages a switch in product presentation, it is encouraged to incorporate elements for both IPV presentations in your initial introduction preparations, in order to minimise the need for later interventions and facilitate the switch. In those circumstances, in principle, no product switch grant will be provided to Ghana.
