Kyrgyzstan	Financial Sustainability	HFSA Core protocol and drill-down, that will complement the Bank's other activities in support of UHC and under the SWAp project. Funding for HFSA will have a strong focus on helping the country with transitioning from major donor fundings, in light of the graduation from the Global Fund and early engagement for Gavi graduation. The HFSA and the drill down modules will inform the country stakeholders to work towards better resource mobilization and management of immunization financing. In addition to an assessment and a transitioning protocol, the HFSA will contribute to supporting the country to work on the next generation of health reform that involve extensive dialogues with country stakeholders on aspects of health financing and service delivery with a focus on immunization and other priority services.	World Bank	HFSA findings contribute to transitions dialogue and development of a new health reform strategy, and EPI unit is better prepared for upcoming Gavi transition. Government financing system strengthened in order to improve coverage and equity of immunization and other priority programs. Domestic resource mobilization improved informed by the fiscal analysis.
