

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Ethiopia	Data	Birth registration provides the data on live births, the denominator, for estimating immunization coverage rates. Train health personnel involved with immunization and birth registration. Undertake Information, education and communication (IEC) activities to sensitize women on birth registration	World Bank	Improved birth registration rates contributing to improved data for estimating immunization rates.
Ethiopia	Demand generation	Support development of HPV communication plan and monitoring of C4D interventions <ul style="list-style-type: none"> <li>• Consultations, evidence, orientation, monitoring</li> <li>• Capacity building- IPC/Prog</li> <li>• Community alliances &amp; dialogue</li> <li>• Cross Channel campaigns</li> <li>• TA and Travel</li> </ul>	UNICEF	Strong demand generation with main focus on high risk communities
Ethiopia	Supply chain and vaccine wastage	1. Provide Technical assistance to FMOH and subnational partners on: designing workshops/meetings on Cold chain management, maintenance and vaccine stock management; EVMA, Cold Chain Equipment Inventory, implementation of the PFSA transition plan, annual MY Vaccine Forecasting, procurement and periodic vaccines inventory.	UNICEF	Contributes to strengthened Immunization Supply and Cold Chain Logistics Management System in the areas of increasing CC space, vaccines stock management, forecasting, procurement and regular inventories.
Ethiopia	Supply chain and vaccine wastage	2. Conduct workshops on Cold chain maintenance for technicians prioritizing hub staff and Cold chain and vaccines management system for PFSA and Woreda EPI focal staffs.	UNICEF	Contributes to strengthened Immunization Supply and Cold Chain Logistics Management System in the areas of increasing CC space, vaccines stock management, forecasting, procurement and regular inventories.

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Ethiopia	Country planning Management and Monitoring	Provision of technical support to FMOH to improve planning with equity focus ( informed by 2016 RIIP assessment results), coordination, develop GAVI related proposals and reports; activities towards development of updated guidelines RED/REC, Equity assessments, REC implementation in 20 priority zones including tailor fit communication approaches and community based platforms to improve EPI service uptake.	UNICEF	Contributes to strengthened evidence based Immunization guidelines, microplans that are better analyzed and will target/reach priority marginalized and unreached groups addressing systems barriers, implementation scale up strategy on zonal technical assistance modality.
Ethiopia	Data	Provide technical Support and advocacy during review meetings and field monitoring on:using local data for action at operational level; at central level on JRF data reviews; coverage survey protocol development and analysis; guidance for interoperability of data systems regarding EPI and birth registration.	UNICEF	Contributes to Improved data quality in JRF reporting. Better recording and reporting system at health center and health posts level.
Ethiopia	Demand generation	Provide technical support at central level to update EPI communication strategy and guidelines to feed into support to zonal health offices for equity focused social mobilization plans and RI communication plans/community approaches in low performing zones; development of communication tools: IPC Manual & advocacy briefs for program manager and key stakeholders ; Polio transition as opportunity to strengthen RI and other child survival interventions; social research and monitoring/reviews of communication and social mobilization activities.	UNICEF	Contributes to increase in number of Vaccinators explaining to every caregiver key messages regarding immunization, including clear messages about when and where to return for the next set of vaccinations; increase no. of community influencers to support EPI service uptake.
Ethiopia	Vaccine implementation	Technical support for Post introduction evaluations for IPV and HPV, development of YF Outbreak Response Plan, MR proposal.	UNICEF	Contributes to increase uptake of NVIs.

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Ethiopia	Vaccine implementation	<p>Provide MLM ToT training for regional and zonal EPI focal persons. Provide integrated EPI/IMNCI trainings for three zones using the WHO EPI/IMCI training tool. Training of MoH staff at various levels on Immunization in Practice for 10 zones not supported since 2014. Support Adaptation of national RED/REC guideline and national ToT for FMOH and regional EPI focal persons. Build capacity on RED/REC in five low performing zones and initiate RED/C approach. Support HPV vaccine related activities (a) best experience : support documentation and sharing of best experiences among countries HPV vaccination implementation at a national scale.</p> <p>(b) Application process: Support in the development of a sustainable implementation plan (selection of delivery strategy, communication/advocacy, training, etc.) and preparation of Gavi applications.</p> <p>(c) Implementation: Support in critical areas, but not limited to; microplanning and social mobilisation, routine monitoring, data quality assurance.</p> <p>Support for other vaccines introduction: Technical support for new vaccines application and introduction including HPV, MenA, MR and Yellow Fever in routine immunisation</p>	WHO	<p>Woredas and PHCUs prioritized using RED approach (improved access and utilization of immunization services);Improved managerial capacity; immunization coverage improved. CSO support well coordinated; increased community awareness and engagement of decision makers</p>

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Ethiopia	Data	Provide DQS training for regional and zonal experts in five regions. Support updating of recording and reporting tools incorporating newly introduced vaccines and upcoming ones. Conduct weekly/monthly data analysis and harmonization and provide feedback to regional coordinators and zonal officers on immunization and surveillance	WHO	Robust real time data collection and analysis Improved indicators; Improved data accuracy and reporting system
Ethiopia	Country planning Management and Monitoring	Support IPV PIE. Support preparation and implementation of comprehensive EPI and surveillance review. Support sentinel sites for new vaccine surveillance for Rota, PBM, intussusception, and congenital rubella syndrome. Activities include capacity building, review meeting, top up fee for sentinel site focal persons and kits procurement for the lab. Support preparation of action points for implementation of recommendations from the measles consultative workshop. Provide technical support to improve SIA quality by: - Providing support for developed detailed plan of action - Reviewing and updating guidelines - Developing Micro-plans at Woreda level and regional level - Developing training materials - Facilitating TOT training at national and sub national levels for SIA coordinators - Supporting preparation, implementation and monitoring of the SIAs . - Supporting Rapid Convenience monitoring and LQAS during and post campaign;	WHO	IPV PIE conducted; action points prepared from recommendations of the measles consultative workshop; enabling factors and barriers identified through comprehensive review; High quality campaigns and achieve high coverage for both polio and measles
Ethiopia	Supply chain and vaccine wastage	Vaccine and cold chain management training to EPI Logistics Officers from PFSA, Regions, districts, and facilities to facilitate the vaccine supply chain system transition. Printing and distribution of vaccine and cold chain management manuals. Support logistics management information system through establishing SMT at District level. Support EVMA	WHO	Improved cold chain and EVM practice as demonstrated by EVM assessments and regular supervisions
