

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Myanmar	Demand generation	Support communication interventions in the following areas: a) Planning and implementation of C4D KAP assessment for immunization; b) Design research and community level solutions for demand generation; c) Accelerate implementation of communication plan of action	UNICEF	Increased availability of reliable data to guide planning and design of communication interventions for EPI
Myanmar	Country planning Management and Monitoring	Support implementation of the key recommendation resulting from desk review on coverage and equity and existing initiatives with a focus on key areas of UNICEF comparative advantages (demand creation, cold chain, vaccine management, partnerships with CSO and Ethnic Health Organisations).	UNICEF	Increased immunization coverage in high risk and low performing areas
Myanmar	Supply chain and vaccine wastage	Roll-out the use of immunization supply chain data use manual and capacity building on generation and use of immunization supply chain data, Key performance indicators and dashboards: a) Develop dashboards for use at lower (paper-based) and higher level (simple electronic). b) Develop detailed implementation plan of dashboards and data use manual for lower and higher level facilities and stores c) Implement training of trainers for rollout of dashboards and data use manual	UNICEF	Increased use of Key performance indicators for immunization supply chain management.

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Myanmar	Supply chain and vaccine wastage	Finalize the development of the electronic logistics information management system for immunization supply chain. a) Based on the governments agreement to the eLMIS functional architecture, develop specific functional requirements. b) Work towards establishment of new business processes and procedures	UNICEF	Strengthened stock management of vaccines and other EPI supplies
Myanmar	Supply chain and vaccine wastage	Assessment of progress, update and facilitate the implementation of 2015 EVM improvement Plan	UNICEF	Improved vaccine and cold chain management practices as per SOP.
Myanmar	Cold Chain equipment	a) Strengthen cold chain equipment inventory management and finalize comprehensive cold chain expansion, replacement and rehabilitation plan b) Strengthen mechanisms for repair and disposal of old equipments and actual space gap for putting equipment in health facilities.	UNICEF	Increased cold chain storage space at all levels as to accommodate new schedule and planned campaign
Myanmar	Financial management	Follow up on implementation of 2016 PEF TCA Supply Financing activities, including establishment of Vaccine Independence Initiative (VII)	UNICEF	Sustainable Government Financing for vaccines supported
Myanmar	Country planning Management and Monitoring	Technical support planning, implementation and monitoring of special strategy targeted for hard to reach area with focus on migratory and peri-urban	WHO	Increased coverage of DPT3 coverage among migratory and peri-urban population
Myanmar	Data	Technical support for improvement of data quality	WHO	Data quality improved validated by DQSA and EPI coverage survey
Myanmar	Vaccine implementation	Technical support for new vaccine introductions, JE catch-up campaign and Preparation for HPV application to GAVI	WHO	JE campaign coverage of more than 90%, HPV application submitted to Gavi.

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Myanmar	Health System Strengthening	Technical support for planning, implementation, M&E and reporting of HSS interventions supported by GAVI HSS 2 proposal	WHO	Performance indicators meet the standard
Myanmar	data	Birth registration provides the data on live births, the denominator, for estimating immunization coverage rates. Develop a plan for improving birth registration using immunization programs. Train health personnel involved with immunization and birth registration. Undertake Information, education and communication (IEC) activities to sensitize women on birth registration	World Bank	Improved birth registration rates contributing to improved data for estimating immunization rates.
Myanmar		<p>additional funding to accelerate the implementation of activities which have been initiated in Myanmar and requires to keep up the momentum to sustain the gain achieved from the initial investment.</p> <p>---Workshop with cold chain key persons at state and Township level on cold chain management, SOP and EVM Improvement plan:</p> <p>--Printing of EVM SOP and CCKP training manuals and job-aids (EVM IP):</p> <p>---Support the initial development of electronic logistics information management system (eLMIS)</p> <p>---Support finalization of communication materials and training for volunteers and basic Health staff (focusing on ethnic languages)</p>	UNICEF
