

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Tanzania	Vaccine implementation	<ul style="list-style-type: none"> <li>• Building the capacity of CHMT and Health Facilities Health Workers on the REC Components in selected regions.</li> <li>• Support the monitoring of the implementation of REC strategy</li> <li>• Evaluation of the REC Strategy and update the implementation approach and quality improvement issues</li> <li>• Review the REC strategy to include the districts with high coverages which are above 100% with unvaccinated and under vaccinated children</li> </ul>	WHO	<ul style="list-style-type: none"> <li>• Reduced number of unvaccinated and under vaccinated children</li> <li>• Improved Immunization service delivery</li> </ul>
Tanzania	Supply chain and vaccine wastage	<ul style="list-style-type: none"> <li>• Facilitate the Cold Chain biannual inventory and update the replacement plan using the CCIT</li> <li>• Build capacity of vaccine management at all levels</li> <li>• Facilitate the application process for CCOEP</li> <li>• Document evidence based need for transition and build the capacity in handling, storage and distribution of vaccines and related materials</li> </ul>	WHO	<ul style="list-style-type: none"> <li>• Improved cold chain and vaccine management</li> <li>• Improved logistics in handling, storage and distribution of vaccines</li> </ul>
Tanzania	Data	<ul style="list-style-type: none"> <li>• Building the capacity of Data Quality Self-Assessment of RHMT, CHMT and Health Facilities Health Workers.</li> <li>• Support the preparation of the Data Quality Review next financial year.</li> <li>• Build the capacity in the use data for action at all levels.</li> </ul>	WHO	<ul style="list-style-type: none"> <li>• Improved data management and use.</li> </ul>
Tanzania	Country planning Management and Monitoring	<ul style="list-style-type: none"> <li>• Assistance to VPD case based surveillance improvement and outbreak investigation and response.</li> <li>• Support the NVS Sentinels Sites and National Lab with reagents and supplies to facilitate timely testing of the specimen</li> <li>• Building the capacity and monitor the performance of Labs</li> <li>• Facilitate quality assurance (internal and external) and supportive supervision to the labs.</li> <li>• Support the quarterly performance reviews of the Sentinel Sites</li> <li>• Enhance collaboration between labs and regional reference labs (networking)</li> </ul>	WHO	<ul style="list-style-type: none"> <li>• Global surveillance indicators achieved</li> <li>• Timely detection, response and containment of outbreaks</li> <li>• Lab achieve the quality assurance indicators</li> </ul>
Tanzania	Health System Strengthening	<ul style="list-style-type: none"> <li>• Facilitate the application process for HPV country wide introduction</li> <li>• Build the capacity and facilitate the operations of NITAG, National AEFI Committees</li> <li>• Provide technical support on the management and operationalization of ICC for both Tanzania Mainland and Zanzibar</li> <li>• Technical support in the immunization related costing and financial sustainability</li> <li>• Provide technical support on the management and implementation of HSS grant and other specific grants</li> </ul>	WHO	<ul style="list-style-type: none"> <li>• Approved HPV application</li> <li>• Functional Immunization committees</li> <li>• HSS planned activities implemented</li> </ul>
Tanzania	Vaccine implementation	Plan and implement RED/REC interventions in the districts with identified immunization inequities – Recruit a consultant to monitor and supervise REC and document the process	UNICEF	Districts with identified immunization inequities increase their immunization coverage and reduce number of un/undr vaccinated children

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Tanzania	Demand generation	Finalize and disseminate IPC training guideline, and roll out IPC training for health workers in six additional poor performing district - TOT training	UNICEF	The 6 poor performing districts have capacity to conduct IPC training
Tanzania	Demand generation	Strengthen community engagement component of REC by conducting a TOT on Integrated Model of Communication for Social Change (IMCFSC) to the district teams; complementing the REC's community linkage component with IMCFSC to increase community participation in routine immunization	UNICEF	UNICEF supported districts have capacity to roll out IMCFSC in the health facilities implementing REC microplans
Tanzania	Vaccine implementation	Support UNICEF staff to carry out monitoring and supportive supervision to districts implementing REC	UNICEF	REC microplans implemented as planned in UNICEF supported Districts and identified challenges addressed
Tanzania	Data	Support rollout of VIMS in six districts supported by UNICEF	UNICEF	UNICEF supported Districts are using VIMS and data quality improved
Tanzania	Cold Chain equipment	Train regional and district technicians from the newly formed Regions and Districts on repair and maintenance of cold chain equipment	UNICEF	Number of reparable refrigerators that are not working in respective regions and districts reduced by 50%
Tanzania	Cold Chain equipment	Support assessment on functionality of installed WICR and carry out maintenance and repair	UNICEF	At 90% of functioning WICRs operate without interruption throughout the year
Tanzania	Cold Chain equipment	Support Vaccines Store at different levels to develop written preventive maintenance plans for buildings and equipment	UNICEF	written preventive and maintenance plans available in at least 50% of the vaccines stores in the regions and districts
