

DATA STRATEGIC FOCUS AREA

BOARD MEETING

Hope Johnson, Stephen Sosler,
Peter Hansen

2-3 December 2015, Geneva

What the Alliance aims to achieve in data by 2020

Focus areas

Immunisation
Delivery, Coverage
& Equity (DCE)

Vaccine-
preventable disease
(VPD) surveillance

Vaccine safety

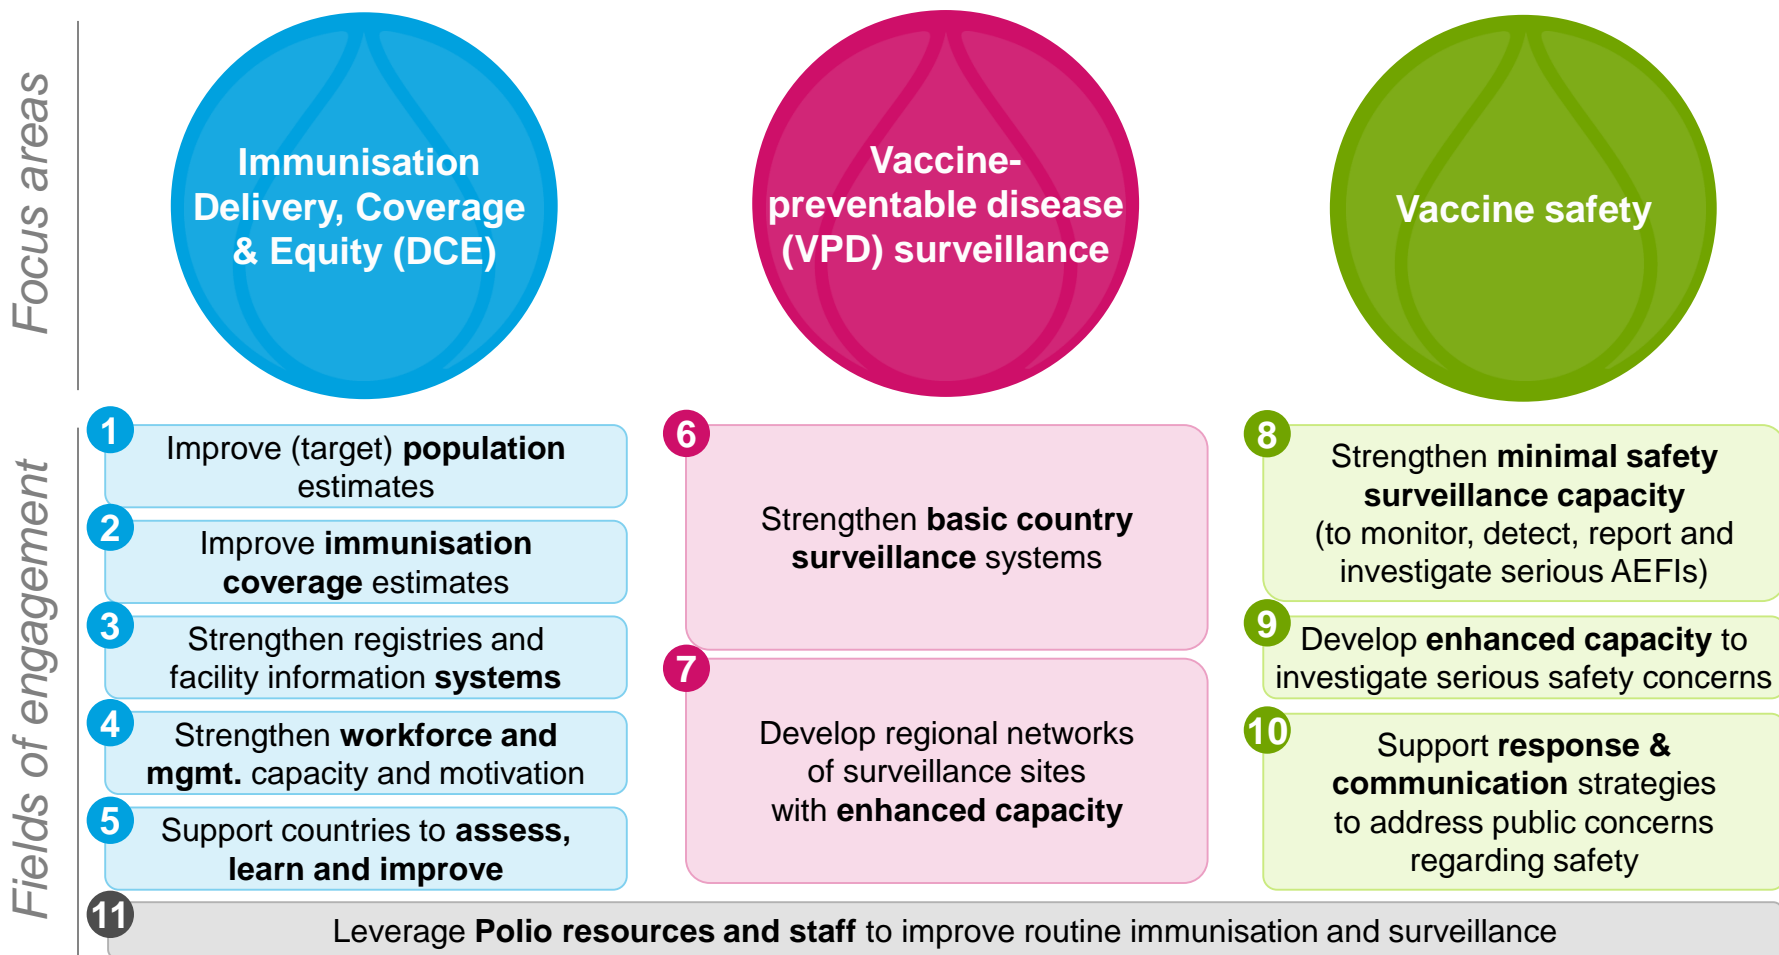

Goals for 2020

Improve the
**availability, quality,
use and transparency**
of data

**Strengthen programme
management, inform
decisions and provide
evidence**

**Identify and
investigate, respond
efficiently and
effectively and address
public concerns**

Scope of engagement in data

Multiple investments to meet critical country needs depending on the context

Example: lack of accurate and granular coverage reports in Uganda

Potential investments

**Support satellite imagery /
geomapping to estimate population**

**Support up-take and scale-up of
next generation immunisation registry**

**Linkages and inter-operability with
existing systems**

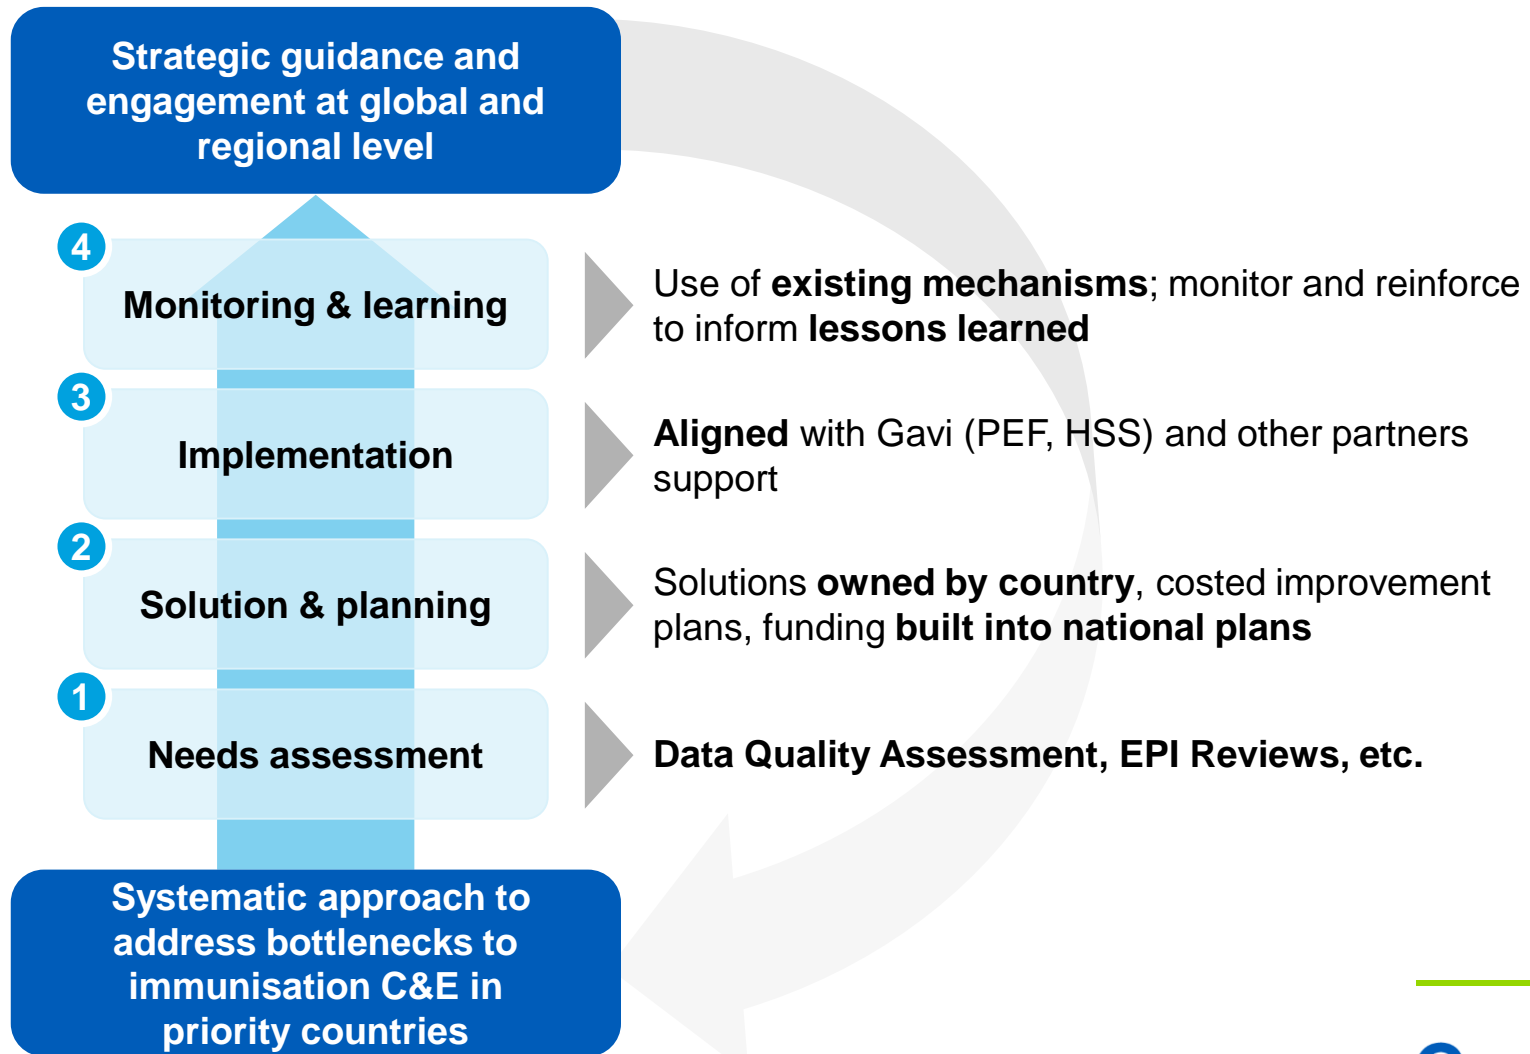

Illustrative examples of solutions implemented

Granular estimates of population at different levels (state, ward, settlement) for **planning, service provision**

Rapid registration of pregnant women / babies into system, real-time **access to immunisation data, with linked individual-unit data**

New immunisation registry linked to newly introduced multi-program DHIS2 platform, with **linkage to other systems** as appropriate to country context

Bottom-up approach guided by and mutually reinforcing global/regional level learning

Board meeting
2-3 December 2015

Decision: Data strategic focus area

The Gavi Programme and Policy Committee recommends to the Gavi Board that it:

- a) **Approve** the high-level approach to the strategic focus area (“SFA”) on data for the 2016-2020 period as set out in Section B of Doc 06 to the PPC.
- b) **Request** the Secretariat to work with partners to operationalise the high-level approach in priority countries starting in 2016, and to ensure that submissions for funding through the PEF are consistent with this approach and the needs of priority countries.
- c) **Request** the Secretariat to ensure that the proportional distribution of PEF funds across data and the other five SFAs is rationalised once other SFAs are developed, and to present these distributions to the PPC in May 2016 to ensure strategic alignment with Gavi priorities.
- d) **Request** the Secretariat to ensure that strategic investments in data made through direct financial support to countries are consistent with the approach to the data SFA as well as with the outcomes of the review of Gavi’s model for direct financial support to countries.
