		SUDAN COVAX TA PLAN			Milestones					Budget for 2020	
Country	Programmatic Area	Activity	Partner	January 2021	March 2021	June 2021	November 2021	Expected Duration of Activity	Expected Outcome	Please specify detailed budget assumptions including f, FTE/# of proposed consultants, where applicable - this should reconcile with the HR profile on the next page	TOTAL \$414.806.40
Sudan	Vaccine, Cold Chain & Logistics	H.1 EstablishVarengihen he National Logistics Working Group (NLWG) with appropriate team of reference and standed operating procedure to reference and standed operating procedure to products deployment; and the NLWG will develop the COVAX bogistics plan	UNICEF	National Injetics working group with appropriate terms of reference and standard operating procedures to coordinate COVID-19 vaccines and ancillary products deployment established	A logistics plan (including distribution plans) for teh COVAX disployment is developed.			more than 3 months	The logistics part of the Vaccine deployment plan is completed on time	cont of two werkshopes to committees TOR and finalize committees TOR and finalize siliped TOR for one National Legista Working Gloup \$7000 Legista Working Gloup \$7000 and the committee of the committee to develop and endorse deployment plan (op persons 1.2 meetings) wwelst-12 weekst-\$500, five mode weekst-\$500, five mode weekst-	\$414,806.40
Sudan	Vaccine, Cold Chain & Logistics	H 2 Map key roles and responsibilities needed for vaccine and ancillary products deployment; collect and confirm contact information for key personnel and facilities	UNICEF					1-2 months	A repositary of key stakeholders that will be contributing to the COVAX vaccine deployment, detailing out heir roles and responsibilities as well as their comparative advantages, are identified	states with potential risk + refresher cost for one day work shop for stakeholders to endorsement the plan (4,000 USD consultant fees for one month, 3000 for workshop cost+2,400 travel cost for the key participant) Desk work and review by	
Sudan	Vaccine, Cold Chain & Loeistics	H.3 Map the potential port(s) of entry, points of storage (stores), and fallback facilities in the country with their respective cold chain storage (2- 8C, -20C, -60/70C) and transportation capacity for vaccines and ancillary products	UNICEF	Potential port(s) of entry, points of storage (stores), and fallback facilities in the country with their respective cold chain storage and transportation capacity for vaccines and ancillary products are mapped.				1-2 months	Vaccines and releated supplies delivered safely	technical cold chain committee to finalize cold chain capacity and sizing, logistic plans and feeback system, Conduct national workshop for 30 persons (\$19000)	
Sudan	Vaccine, Cold Chain & Logistics	H.4 Assess dry storage and cold chain capacity, including completing the CCE sizing gold to the CCPE. The CCPE is a completion of the CCPE and the C	UNICEF		Dry storage and cold chain capacity at all levels with regards to the COVID-19 vaccines characteristics are assessed and supply and logistics gaps are identified. Vaccine stock management tools and operating procedures to reflect the characteristics of COVID-19			1-2 months	Dry and cold chain storage capacity are enhanced to accommodate the additional needs for COVAX The specific COVAX needs	National Consultant at NOC level for 2 months (4,000 USD/month), Conduct engagement workshop for 30 stakeholdres at national and state levels (30 persons *3 days* 1605 non resident) = 14,400 \$\frac{1}{2}\$ transportant NOB level to review and update stock management tools to reflect COVID vaccine for six months (consultant NOB level).	
Sudan	Vaccine, Cold Chain & Logistics Demand Generation &	opensing procedures to reflect the characteristics of COVID-19 veccines (i.e. visil size, VVM) J.Z. Establish data collection systems, including 1)	UNICEF	Data collection gystems, including 1) social mode listerino and numor management, and 2)	the challenger of CVVM_) undered. e. veil size, VVM_)			more than 3 months	are fully reflected in all guidelines, tools and SOPs and SOPs batts on the community, service providers and stakeholders' knowledge and perceptions around the vaccine collected and analized to inform the design and	3.500 'emonths=21.000USD). 2000 for travel hashinston Contract: A research institute will be contracted for 6 months (fees =15.000USD '6 months = 90.000 USD) in order to carry out data collection through various means to establish an accurate database on which informed interventions and accurate database on which informed interventions and accurate database on which provides can be formulated; around the Covid-19 around the Covid-19 condemise. community	
Sudan	Communication Demand Generation & Communication	social media listening and rumor management, and 2) assessing befeavioral and social data and 2) assessing befeavioral and social data. J.1 Design a demand plain (includes advocary, communications, social mobilization, risk and assets comms, communications, social mobilization, risk and sately comms, communications, social mobilization, risk and sately comms, communication, social mobilization, risk and demand for COVID-19 societies, Master include a communication propriet data sprange of the communication	UNICEF	meda istening and rumor management, and 2) assessing behavioral and social data established.	Demand plan (includes advocacy, communications, social y communications, community engagement, and training) despress.			more than 3 months	Dearment interventions. Communities sensitiated on the second and sensitiated	patients of the control of the communication plan and decign and facilities, the communication plan and design and facilities implementation of social implementation of social implementation of social community engine of TOI on Social mobilization and the community engineers of the control	
Sudan	Demand Generation & Communication Vaccine, Cold Chain &	J.3 Develop key messages and materials for public communications and advocacy, in alignment with deepand plan (coursest required for custom and NuPID dearnors and support clearance and succine transportation from airport clearance and succine transportation from airport	UNICEF		Required document for custom and NMPB clearance of COVID 19 vaccine and related devices availed and vaccine transported safely to the central vaccine store			more than 3 months	Messages developed and production completed to include a variety of formats such as TV and Radio episodes, videos, printed material, jingles and songs. Vaccine received smoothly	Institution Contract: An institution will be contracted for 3 months; (Fees: 15,000USD *3 months = 45,000USD) for development and production of messages in the form of videos, jingles, radio and TV episodes. ** Cost of custom clearance of vaccine and other devices and stransporation from port of entry.	
Sudan	Logistics Training & Supervision	to national central vaccine store ToT of state EPI officers and cold chain managers on Effective management of COVID 19 vaccine and its ancillary products	UNICEF			ToT implemented		0-1 month	and safely in the country State EPI and vaccine/cold chain managers are equipped to appropriately manage COVID 19 vaccine and its ancillary products	to federal EPI store DSA: 4 Persons per state*18 states *2 days*\$100=\$14,400	\$685,003.30
Sudan	Planning & Coordination	A.5. Inform regularly & disseminate global and regional guidance (i.e. SAGE) with NTAGs & RTAGs and support NTAG working groups on COVID-19 vaccines	WHO	Global and regional guidance disseminated to NITAGs & RITAGS and NITAG working groups on COVID-19 vaccines.	TORs for Covid-19 NITAG revisited and the needed member identified and added, including roles and responsibilities and meetings schedule finalized with MoH sign- off.	Briefing schedule for key ministries, NITAG, stakeholders and partners developed and followed. NTWG subcommittees formulated		more than 3 months	COVID vaccine introduction was approved and technically supported by NITAG	15 participants - 2 meetings per month for 6 months - 26 \$ per meeting	
Sudan	Planning & Coordination	A.2. Establish for engage an existing working group is Astronat Technical Working Group (SWING) for COVD 19 wasches introduction with terms of reference, rules and responsibilities and resolution meetings. A.3. Establish or engage existing NTWO subcommitmees, if regulated, to over the following workstreams: I) sworked definity 2 vaccine, cold	wнo	TORs for Covid-19 NTWG including roles and responsibilities and meetings schedule finalized with Mott sign-cet.		for the following worksteams: 1) service delivery 2 securine, cold during 1 securine, cold during 1 securine, cold during 1 securine, cold during 1 securine, cold for securine 2 secur		more than 3 months	National technical committee theretoring	15 persons*Imeeting/week*24 weeks*\$26	
Sudan		chain & logistics, 3) demand generation & communication (b) prioritization, targeting and CDVID-19 surveillance, (5) Monticoting and proof of succension, mentoling of coverage among at-lesk groups, and monitoring of succeins empact (6) Safety, including injury prevention and AET detection and response compact (10) Safety, including injury prevention and AET detection and response values of the control of the communication of the communication (10) and the communication (10) a	wно			proof of eligibility, proof of vaccination, monitoring of coverage among shrisk groups, and monitoring of vaccine impact (8) Safety, including injury prevention and AEFI detection and response, established or if pre-existing, engaged.		more than 3 months	policies, strategies and plans for different sections of vaccine deployment plan and regulatory pathway were discussed, agreed on and developed to feed in NVDP	6 subcommittees, 6 persons/subcomittee* 1 meetings/week*24 weeks*\$26	
Sudan	Planning & Coordination	bodies (National COVID-19 Response Coordinating Committee, CNCC, CTVIG, NITAG, National Inmunization Programme, National Regulatory Nutrolly, AEP committee and other Regulatory Nutrolly, AEP committee and other NDVP should be in line with WHO guidance and SAGE recommendations (plan can be developed by adapting the Pandemic Influenza NDVP, if existing)	WHO	NDVP developed with input from relevant bodies (National COVID-19 Response Coordinating COVID-19 Response Coordinating COVID-19 Response Coordinating COVID-19 Response COVID-	Government signature for legal agreement for receiving Covid-19 vaccines reviewed and prepared for	National vaccine access/ procurement approach identified and planned for, and the relevant paperwork is completed.		more than 3 months	Vaccine deployment plan and vaccine request application developed	one national consultant at NOB level for three months (3500°6 months), support technical committee for support approval and development of NVDP.(5 persons "\$28/day"5 days) concensus workshop(workshop=10000\$)	
Sudan	Regulatory Aspects	C.2 Ensure the national regulator or authority has clarified the requirements and documents needed for regulatory approvals of COVID-19 vaccines	wнo	Expedited import approval/waiver from appropriate authorities identified and confirmed with WHO.	guidelines for postmarketing surveillance developed Plans for safeguarding the security			more than 3 months	Regulatory approval for COVID 19 vaccine granted	One national consultant at NOB level for three months (3500°3 months), support septical committee for support approval and development of post marketing surveillance tools (10 persons "\$250day") Odays) Training on the post marketing surveillance tools developed (training workshop =15000\$)	
Sudan	Service Delivery	E.2 Identify potential COVID-19 vaccine delivery strategies leveraging both existing vaccination platforms and non-vaccination delivery approaches to best reach identified target groups E.1 Update protocols for infection prevention and	WHO	Master list and strategy of service providers for effectively delivering COVID-19 vaccine to various target populations delivered. Plans for safeguarding the security of staff (e.g.	Prains for sareguarding the security of staff (e.g. during an emergency or major campaign) as well as security at the central and/or regional storage facilities and for intransit of products developed.	Potential COVID-19 vaccine delivery strategy identified to best reach target groups.		more than 3 months	Risk target group identified, microplans and strategies for vaccination agreed on, vaccination of the identified risk group completed	technical committee (20 persons*3 meeting/week* 8 weeks*10\$) +	
Sudan	Service Delivery	E.1 update protocots for interestion prevention and control measures including adequate personal protection equipment (PPE) to minimize exposure risk during immunization sessions	WHO	Prairs for sareguarding the security of star (e.g. during an emergency or major campaign) as well as security at the central and/or regional storage facilities and for in-transit of products developed.				more than 3 months	IPC measures for immunzation service secured	Development of the IPC materials (\$10000),	

Sudan	Training & Supervision	F.1 Develop a training plan to prepare for COVID- 19 vaccine introduction that includes key groups of participants, content topic areas, key training partners and training methods (in-person or virtual). WHO will provide a template for quidance	WHO	Training materials developed by Who adapated and transited, as well as additional training materials developed as required.		Trainings conducted as per the training plan.		more than 3 months	training materials developed and trainings conducted as per phases of the vaccine deployment	The National consultant for the NVDP will develop the training material and the vaccine application = 0
Sudan	Safety Surveillance	I.1 Ensure that guidelines, documented procedures and tools for planning and conducting vaccine pharmacoligilance activities (i.e. AEFI reporting, investigation, causality assessment, risk communication and response in ae available.	WHO		Guidelines, documented procedures and tools for planning and conducting vaccine pharmacowighlance activities (i.e. AEFI reporting, investigation, causality assessment, risk communication and response) are made available.			1-2 months	AEFI and post marketing surveillance guidelines , tools and procedures developed	Technical committee to develope AEFI tools and procedures, 6persons*2meetings\week*12 weeks*505
Sudan	Safety Surveillance	L5 Plan active surveillance of specific COVID-19 vaccine related adverse events. If this is not possible, develop provisions that allow reliance on active surveillance data, decisions, and information from other countries or regional or international bodies	WHO	Active surveillance of specific COVID-19 vaccine related adverse events is planned for.	AEFI committee to review COVID- 19 Vaccine safety data (e.g., causality assessment of serious AEFI, clusters of AEFI, emerging safety concerne etc.) is trained.	Provisions that require manufacturers to implement risk management plans and collect and report COVID-19 vaccine safety data to the NRA are identified.		more than 3	Functioning AEFI surveillance system in place	Travelling cost for subnational traveling for training. Montoring and supersion (25000). AEFI committee meetings (15 persons*50S*6 meetings). Train core medical staff at states HFs
Sudan	Safety Surveillance	I.2 Assure competent and trained staff to perform vigilance activities	WHO	Competent and trained staff to perform vigilance activities	Competent and trained staff to perform vigilance activities	Competent and trained staff to perform vigilance activities		more than 3 months	Functioning AEFI surveillance system in place	Trained Core medical staff at state HFs
Sudan	Safety Surveillance	I.3 Expedite training the AEFI committee to review COVID-19 Vaccine safety data (e.g., causality assessment of serious AEFI, clusters of AEFI, emergine safety concerns etc.)	WHO	AEFI committee to review COVID-19 Vaccine safety data (e.g., causality assessment of serious AEFI, clusters of AEFI, emerging safety concerns etc.) is trained.	AEFI committee to review COVID- 19 Vaccine safety data (e.g., causality assessment of serious AEFI, clusters of AEFI, emerging safety concerns etc.) is trained.	AEFI committee to review COVID- 19 Vaccine safety data (e.g., causality assessment of serious AEFI, clusters of AEFI, emerging safety concerns etc.) is trained.		more than 3 months	Functioning AEFI surveillance system in place	20 persons*1 meeting/week*24 weeks*\$50, Travel \$17500, workshop \$25000
Sudan	Monitoring & Evaluation	G.2 Develop or adapt necessary monitoring tools or adapt existing tools: vaccination cardicentificate - facility-based nominal registers and/or tally sheets, vaccination reports (paper and/or electronic) and analytical tools to monitor progress and coverage among different at-risk ratenories:	WHO	Necessary monitoring tools developed or existing tools (vaccination card/certificate - facility-based nominal registers and/or tally sheets, vaccination reports (paper and/or relectron)) adapted and analytical tools to monitor progress and coverage among different at-risk categories developed.	Monitoring tools produced and distributed to eligible vaccination providers:			more than 3	Registartion and monitoring tools developed, coverage quarterly reports prepared and shared with partners	M&E committee meetings (8 persons*3 meeting/week* 8 weeks*28
Sudan	Monitoring & Evaluation	G.1 Develop or adapt existing surveillance and monitoring framework with a set of recommended surveillance etc) for COVID-19 vaccines between the commended surveillance etc) for COVID-19 vaccines between the comme	WHO		Existing surveillance and monitoring framework with a set of recommended indicators (coverage, acceptability, disease surveillance etc) for COVID-19 vaccine developed or adapted.			more than 3 months	Functional surveillance system in place	Technical committee to develope sureillance tools and guidellines, bearsons '2meetings\week' 12 weeks' 26\$+ concensus workshop
Sudan	Monitoring & Evaluation	G.3 Produce and distribute monitoring tools to eligible vaccination providers, develop, test and roll-out any changes to electronic systems, provide training for use of these tools and processes to traditional and new provides	WHO	Monitoring tools produced and distributed to eligible vaccination provides.	Monitoring tools produced and distributed to eligible vaccination providers.			more than 3	Functioning efficient and effective monitarinf tools implace	Technical committee to develope sureillance tools and guidelines, 6persons'2meetings\week*12 weeks*50\$, 2 training sessions*100.00\$ for 30 participants\session
Sudan	Prioritization, Targeting	D.2 Estimate potential numbers of target populations that will be prioritized for access to vaccines stratified by target group and geographic location, i.e. prepare first to define, identify and estimate no. of HCWs	WHO	Ensure relevant epidemiological data is collected in coordination with national COVID-19 disease surveillance group.	Estimates of potential numbers of target populations that will be prioritized for access to vaccines stratified by target group and geographic location, i.e. prepare first to define, identify and estimate no. of HCVs are available.	Progress of NITAG working groups on COVID-19 vaccines monitored, and interim recommendation on prioritization and risk groups issued.	Progress of NITAG working groups on COVID-19 vaccines monitored, and interim recommendation on prioritization and risk groups issued.	more than 3 months	Target group identified and regulary updated based on the monitoring of the epdemiological data	National consulatant at NOB level for 6 months (3500°6 months"), Travelling subnational \$10000
Sudan	Planning & Coordination	Subnational COVAX committee	WHO	Support the subnational COVAX activities	Support the subnational COVAX activities	Support the subnational COVAX activities		more than 3 months	Strengthen COVAX activities at field level	10 preson*2 meetings\month*6 months*18 states*10\$ refreshments
Sudan	Planning & Coordination	Orientation of Professional associations	WHO	Orientation workshop	Orientation workshop			1-2 months	All associations of targted groups	100 preson\ workshp, 25000\$\workshop* 2workshops
Sudan	Planning & Coordination	Develoo states and locality microplans	wнo	Develop and approve microplans				0-1 month	Development of guidelines, quality microplans in place	National consultant at NOB (6month*35005 per month), microplaning workshop 190005, supportive supervision (2 persons*3days*18 states*505 per day/to states for quality microplaning for 18 states
Sudan	Planning & Coordination Monitoring & Evaluation	Revision and approval of micro plan Develope supervisory checklist for the new vaccine and	wнo	National workshop to review and approve microplan	Conduct intensive supportive	Conduct intensive supportive		1-2 months more than 3	approved microplans achieved support the states and locality	2 person\state*18state*3days*50 \$ +workshop 2 persons* 7 days * 50\$ * 18
Sudan		intencive supportive supervision to states and locality	WHO	Develop the supervisory checklist	conduct intensive supportive	conduct intensive supportive		months	canacity regarding COVAX	z persons* / days * 505 * 18 states * 2 time visit
