⁵ This is the amount that Gavi has approved.

Gavi's usual co-financing requirements do not apply to IPV. However, Kiribati is encouraged to contribute to vaccine and/or supply costs for IPV.

16. Additional reporting requirements:

Requirement	Due dates
<p>To prepare for the annual procurement of vaccines, Country shall submit the following information each year:</p> <ul style="list-style-type: none"> Vaccine stock levels including buffer stock, by end March; Number of children to be vaccinated, wastage rates, any proposed changes in product, presentation or use, or minimum co-financing levels and vaccines received, by mid-May. Countries shall report the actual switch date in the first renewal request following the actual implementation. 	<p>31 March 2019</p> <p>15 May 2019</p>
In accordance with applicable Gavi processes, Country shall report on programmatic and financial performance.	To be agreed with Secretariat

17. Financial clarifications: Not applicable

18. Other conditions:

Due to unprecedented demand for IPV and the challenges to scale up production capacities, the global IPV supply remains constrained and is unlikely to meet all country requirements in the short term. As a consequence, the actual presentation and number of doses shipped may differ from those specified in this Decision Letter. In order to mitigate these circumstances, you are strongly encouraged to optimally manage available supply and follow recommendations and guidelines from WHO and UNICEF to reduce vaccine wastage.

If Kiribati envisages a switch in product presentation, it is encouraged to incorporate elements for both IPV presentations in your initial introduction preparations, in order to minimise the need for later interventions and facilitate the switch. In those circumstances, in principle, no product switch grant will be provided to Kiribati.

On behalf of Gavi
