IPV Routine Programme (doses)		249,100
IPV Catch-up vaccination (doses)		
Annual Amounts (US\$)	17,061	207,000

12. Procurement agency: UNICEF.

13. Self-procurement: Not applicable

14. Co-financing obligations:

Gavi's usual co-financing requirements do not apply to IPV. However, Sierra Leone is encouraged to contribute to vaccine and/or supply costs for IPV.

15. Operational support for catch-up campaigns: Not applicable

16. Additional reporting requirements:

Reports and other information	Due dates
To prepare for the annual procurement of vaccines, Country shall submit the following information in May each year: number of children to be vaccinated, vaccine stock levels including buffer stock, wastage rates, any proposed changes in presentation or minimum co-financing levels and vaccines received.	15 May 2018
In accordance with applicable Gavi processes, Country shall report on programmatic and financial performance.	To be agreed with Secretariat

17. Financial clarifications: Not applicable

18. Other conditions: Due to unprecedented demand for IPV and the challenges to scale up production capacities, the global IPV supply remains constrained and is unlikely to meet all country requirements in the short term. As a consequence, the actual presentation and number of doses shipped may differ from those specified in this Decision Letter. In order to mitigate these circumstances, you are strongly encouraged to optimally manage available supply and follow recommendations and guidelines from WHO and UNICEF to reduce vaccine wastage.

If Sierra Leone envisages a switch in product presentation, it is encouraged to incorporate elements for both IPV presentations in your initial introduction preparations, in order to minimise the need for later interventions and facilitate the switch. In those circumstances, in principle, no product switch grant will be provided to Sierra Leone.
