|--|--------|
| TABLE OF CONTENTS | |
| Your quick guide to using this toolkit: structured as per Gavi's strategy, each section below contains messages and graphics to share with your network. | |
| OVERALL PROGRESS | page 3 |
| Alliance performance against overall objectives: children immunised and future deaths averted. | |
| PROGRESS QUOTE CARDS | page 4 |
| Key messages from Dr Seth Berkley and Dr Ngozi Okonjo-Iweala. | |
| VACCINE PROGRESS | page 5 |
| Accelerating vaccine uptake and focus on "zero-dose" children, who are not receiving the first dose of basic vaccines. | |
| HEALTH SYSTEMS PROGRESS | page 6 |
| Investment in strengthening health systems: building resilience to respond. | |
| SUSTAINABILITY PROGRESS | page 7 |
| Ensuring vaccine programmes are sustainable for countries when Gavi's support ends. | |
| MARKET SHAPING PROGRESS | page 8 |
| Measuring how market shaping activities benefit countries: vaccine prices and availability. | |

REPORTING ON GAVI'S PROGRESS

Join us in sharing with your networks key data points, milestones and progress – while looking ahead at our COVID-19 response and the key challenges posed by the pandemic.

KEY MESSAGES

2019: a record-breaking year for childhood immunisation

The year 2019 saw significant progress in Gavi's work to support health systems:

- ✓ countries delivered a record number of routine vaccinations – more than 230 million
- ✓ Gavi disbursed a record US\$ 331 million in health system support

Gavi supported efforts to bring forward the world's first Ebola vaccine, which, as of December 2019, helped protect over 260,000 people in the Democratic Republic of the Congo.

In 2019, Gavi-supported countries invested more in our immunisation partnership than ever before, contributing a total of US\$ 102 million towards the co-financing of Gavi-supported vaccines.

The successes of 2019 are a testament to the power of the Vaccine Alliance – from our core partners to the dedicated, passionate people in countries and communities upon whose hard work and expertise we rely every day to protect the next generation.

#VaccinesWork

Gavi The Vaccine Alliance

SOCIAL MEDIA MESSAGES

- 🐦 2019 was a record-breaking year for childhood immunisation and #globalhealth with over 65 million children immunised! Learn more about how @Gavi worked with partners to make #VaccinesWork: <https://bit.ly/35qRjyB>

SOCIAL MEDIA MESSAGES

- 🐦 In 2019, the number of children immunised in Gavi-supported countries was 50% higher than in 2000. And yet 10.6 million children are not receiving even the first dose of basic vaccines. Here's how @Gavi is working to leave no one behind: <https://bit.ly/35qRJyB>
- 🐦 .@Gavi-supported vaccines prevented approximately 1.5 million future deaths in 2019! #VaccinesWork to help children enjoy a healthy childhood, finish their education and create a healthy workforce to prevent poverty and boost economies. Read more: <https://bit.ly/35qRJyB>
- 🐦 In 2019, countries immunised 65 million children with @Gavi support to protect each child against on average 7 infectious diseases – that's nearly half the children born in the world last year! #VaccinesWork <https://bit.ly/35qRJyB>

SOCIAL MEDIA MESSAGES

- “Together, we’ve vaccinated an entire generation of children – ‘Generation Gavi’ – while maintaining a relentless focus on leaving no one behind without the life-saving power of immunisation.”
- Dr @GaviSeth Berkley, Gavi CEO
[#VaccinesWork https://bit.ly/35qRJyB](https://bit.ly/35qRJyB)
- “Never has the world’s attention been so focused on the critical role vaccines play in protecting lives, livelihoods and economies.” - @NOIweala, @Gavi Board Chair
[#VaccinesWork https://bit.ly/35qRJyB](https://bit.ly/35qRJyB)
- Thanks to the work of Alliance partners, from 2000–2019:
 - >822 million children were vaccinated through routine programmes
 - >14 million future deaths were preventedRead more about @Gavi’s progress in 2019: <https://bit.ly/35qRJyB>

SOCIAL MEDIA GRAPHICS

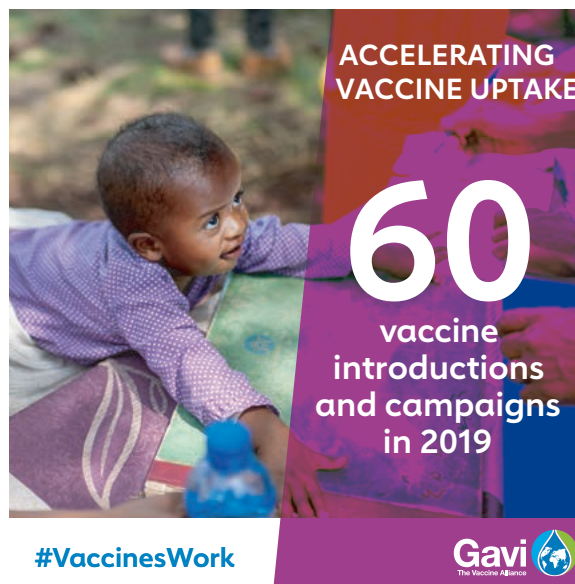

VACCINE PROGRESS

accelerate equitable uptake and coverage of vaccines

SOCIAL MEDIA MESSAGES

- 🐦 Emergency stockpiles are an essential tool to contain outbreaks and protect affected communities. In 2019, thanks to @Gavi and partners, >28 million stockpile doses were shipped to protect people from cholera, meningococcal meningitis and yellow fever: <https://bit.ly/35qRjyB>
- 🐦 Over the past four years, the average number of @Gavi-supported vaccines that a child receives through routine immunisation has nearly doubled – meaning that more children are protected against more serious diseases than ever before! #VaccinesWork <https://bit.ly/35qRjyB>
- 🐦 In 2019, stockpiles for cholera, meningococcal and yellow fever vaccines were accessed a total of 22 times by 12 countries. Stockpiles can be quickly deployed to protect affected communities. Read more about @Gavi's work to quickly contain outbreaks: <https://bit.ly/35qRjyB>
- 🐦 With support from the Vaccine Alliance, countries provided more than 400 million campaign and routine vaccinations in 2019! @Gavi's partnership continues to contribute to #globalhealth and prosperity. <https://bit.ly/35qRjyB>

SOCIAL MEDIA GRAPHICS

- 🐦 In 2019, @Gavi supported 60 vaccine introductions and campaigns! That's 14 more introductions compared to 2018 to ensure that children are protected against more preventable diseases to help them prosper and thrive! #VaccinesWork <https://bit.ly/35qRjyB>

- 🐦 In 2019, the number of children immunised in @Gavi-supported countries was up by 50% compared to 2000. And yet 10.6 million children are not receiving even the first dose of basic vaccines. Here's how Gavi is working to leave no one behind: <https://bit.ly/35qRjyB>

HEALTH SYSTEMS PROGRESS

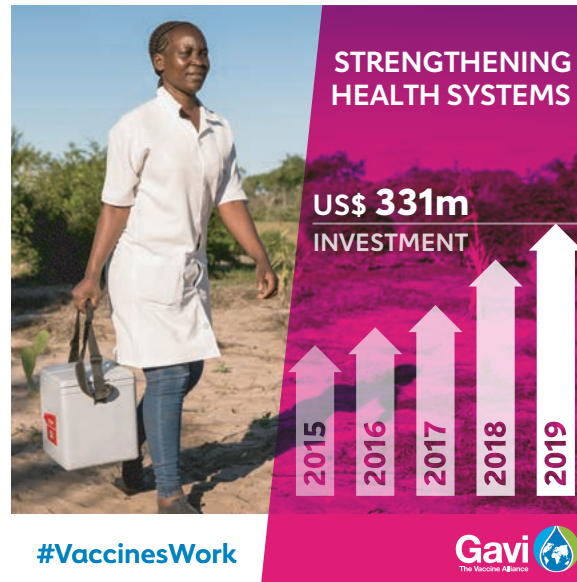

increase the effectiveness and efficiency of immunisation delivery as an integrated part of strengthened health systems

SOCIAL MEDIA MESSAGES

- In 2019, @Gavi disbursed a record US\$ 331 million in health system support

This unprecedented funding saw countries deliver a record number of routine vaccinations – over 230 million – to protect children in the countries where it is most needed. <https://bit.ly/35qRJyB>
- Coverage of one dose of pentavalent vaccine – which protects children against five major diseases - increased to 87% in 2019 within @Gavi-supported countries. This means more children are protected by life-saving vaccines! #VaccinesWork <https://bit.ly/35qRJyB>

SOCIAL MEDIA GRAPHICS

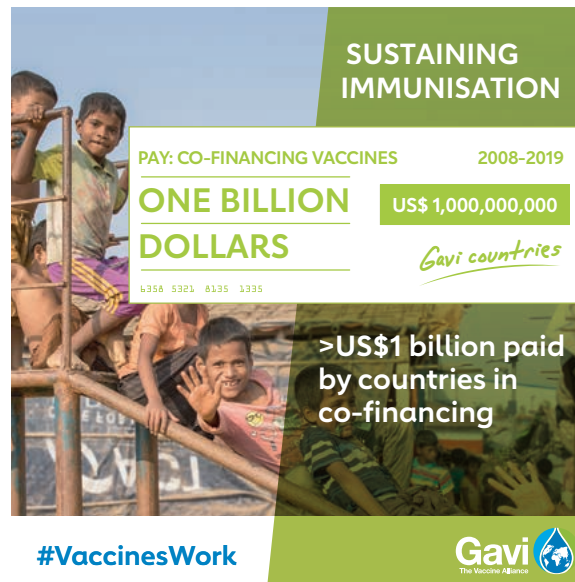

SUSTAINABILITY PROGRESS

improve sustainability of national immunisation programmes

SOCIAL MEDIA MESSAGES

- With [@Gavi](#) support, countries are building sustainable immunisation programmes by co-financing vaccines to enhance country ownership of vaccine programmes. Since 2008, more than US\$1 billion has been paid by countries in co-financing contributions! <https://bit.ly/35qRJyB>
- Countries have self-financed vaccine programmes introduced with [@Gavi](#) support valued at US\$ 204 million in 2019, bringing the total estimated value of country investments in self-financed programmes to more than US\$ 0.7 billion! [#VaccinesWork](#) <https://bit.ly/35qRJyB>
- In 2019, countries fully self-financed 47 vaccine programmes originally introduced with [@Gavi](#) funding! Read more about country ownership and their commitments to making [#healthsecurity](#) a priority: <https://bit.ly/35qRJyB>

SOCIAL MEDIA GRAPHICS

MARKET SHAPING PROGRESS

shape markets for vaccines and other immunisation products

SOCIAL MEDIA MESSAGES

- Thanks to the work of @Gavi and Alliance partners, the cost to fully immunise a child with pentavalent, pneumococcal and rotavirus vaccines fell to about US\$ 15 in 2019. Ensuring life-saving vaccines are affordable and accessible helps children thrive! <https://bit.ly/35qRjyB>
- Thanks to @Gavi's work with partners, three improved vaccine products were procured in 2019: one each for measles-rubella, pneumococcal and rotavirus. Here's how innovation makes vaccines safer and more accessible: <https://bit.ly/35qRjyB>
