

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Afghanistan	Supply chain and vaccine wastage	Key areas: (Cold chain, Vaccine Management, Follow up EVM recommendations, Logistics)	UNICEF	Increase in coverage and reduction in wastage of vaccines
Afghanistan	Data	Key areas: (Coverage and Equity, Disaggregated analysis, Bottlenecks analysis, Evaluating coverage improvements and accelerated immunization interventions, Immunization Data Quality and Desk review of EPI)	UNICEF	<ol style="list-style-type: none"> 1. Improve mechanism for data collection and analysis visualization and evidence based planning; 2. Produce higher quality data and support data use for implementation. 3. Enhanced real time monitoring of performance and increased accountability at all levels
Afghanistan	Demand generation	EPI Demand generation and Communication	UNICEF	Submission of KAP survey result.
Afghanistan	Health System Strengthening	Data, comm, VCC, surveillance, coordination and finance	UNICEF	EPI programme strengthened through provision of dedicated technical human resource for cold chain, data quality, Surveillance, and communication.
Afghanistan	Demand generation	Finalization of communication strategy for RI and its relevant costs	UNICEF	Technical support available for implementation of awareness raising interventions on RI
Afghanistan	Demand generation	Awareness events on RI Radio and TV spots	UNICEF	Awareness on importance of vaccination increased among public to reduce dropout rate and increase coverage.

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Afghanistan	Country planning Management and Monitoring	In-country travel of NTA staff	UNICEF	EPI programmes smoothly implemented with increased coverage.
Afghanistan	Vaccine implementation	Conduct national EVM assessment	UNICEF	Fresh EVM report available.
Afghanistan	Leadership Management and Coordination	Revise/update national immunization Policy	WHO	Revised NIS meeting the current and future needs of NIP
Afghanistan	Country planning Management and Monitoring	Conduct national annual EPI plan review workshop & develop NIP plan of actions for 2017	WHO	Annual EPI Plan of Action
Afghanistan	Data	1. Adapt/translate/print WHO guideline on immunization home-based records and as an important component include into the schedule of refresher courses for vacconators 2. Continue building national capacity in further strengthening routine immunization data management (recording, reporting, analysis, interpretation, , communication, implementation and monitoring) of routine immunization and VPD surveillance data through training workshops and engagement of PEI staff in RI monitoring	WHO	Improved RI data accuracy and quality
Afghanistan	Vaccine implementation	Assess recommended EVM improvement plan implementation	WHO	Report on improved implementation status
Afghanistan	Vaccine implementation	Preparations for Rotavirus vaccine introduction	WHO	RVV introduced into national immunization schedule
Afghanistan	Country planning Management and Monitoring	Revise/print national AEFI surveillance guideline/tool for immunization health workers & train immunization health workers of AEFI surveillance & Translate/print global manual on surveillance of adverse events following immunization for using by doctors and nurses for timely case management and initial investigation of AEFI cases	WHO	Improved AEFI surveillance system

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Afghanistan	Country planning Management and Monitoring	Revise/translate/print/distribute national MR surveillance guideline and tools & Train master trainees new AFP/MR/MNT surveillance focal points and lab technicians on MR surveillance	WHO	Strengthened MR surveillance
Afghanistan	Country planning Management and Monitoring	Activities implemented by surveillance focal points.	WHO	Strengthened MR surveillance
Afghanistan	Country planning Management and Monitoring	Conduct quarterly quality control of MR laboratory performance and seotyping/genotyping of measles and rotavirus in CPHL	WHO	Evidence-based data available
Afghanistan	Country planning Management and Monitoring	Perform monthly collection, compilation, analysis and reporting of VPD surveillance data, and conduct bi-weekly VPD surveillance committee meeting and twice/year NMVC meeting,	WHO	Evidence-based recommendations
Afghanistan	Country planning Management and Monitoring	Conduct field visits for monitoring of VPD surveillance activities	WHO	strengthen VPD surveillance
Afghanistan	Country planning Management and Monitoring	Improve routine immunization system, coverage, equity, data quality & introduce new vaccine/s, Strengthening VPD surveillance	WHO	Routine Immunization and VPD Surveillance Strengthened
Afghanistan	Country planning Management and Monitoring	Improve routine immunization system, coverage, equity, data quality & introduce new vaccine/s, Strengthening VPD surveillance	WHO	Routine Immunization and VPD Surveillance Strengthened
Afghanistan	Country planning Management and Monitoring	Improve routine immunization system, coverage, equity, data quality & introduce new vaccine/s, Strengthening VPD surveillance	WHO	Routine Immunization and VPD Surveillance Strengthened
Afghanistan	Country planning Management and Monitoring	Improve routine immunization system, coverage, equity, data quality & introduce new vaccine/s, Strengthening VPD surveillance	WHO	Routine Immunization and VPD Surveillance Strengthened
Afghanistan	Country planning Management and Monitoring	Improve routine immunization system, coverage, equity, data quality & introduce new vaccine/s, Strengthening VPD surveillance	WHO	Routine Immunization and VPD Surveillance Strengthened

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Afghanistan		International Immunization officer to focus on Polio RI convergence	WHO
