

Country	IRMA Framework	Location	Programmatic Area	HSS objective	Activity	Partner	TOTAL
Afghanistan	Reach	National & Subnational	Human Resources for Health	Human resources for HHS	Coordination of NITAG, TAGs, Task forces and other immunization related forums.	WHO	
Afghanistan	Advocate	National & Subnational	Vaccine-Specific Support	Achieve global and regional goals for accelerated disease control, elimination and eradication.	Provide technical support in developing application for nationwide measles SIA in 2022	WHO	
Afghanistan	Advocate	National & Subnational	Vaccine-Specific Support	Introduce and expand the use of new vaccines, as determined by country-led, evidence-based decisions in the context of comprehensive health promotion and disease control interventions.	Assist NIP/MOPH in developing application for introduction of combined Rubella with Measles vaccine	WHO	
Afghanistan	Monitor	National & Subnational	Data	Documenting the impact of hepatitis B immunization and set baseline on burden of Hepatitis B among children 6M-10Y	Provide technical assistance in carrying out hospital/lab-based serosurvey	WHO	
Afghanistan	Reach	National & Subnational	Service Delivery	Prevent and respond to vaccine preventable diseases in outbreaks and humanitarian crises/emergencies	Assist MOPH/BPHS implementing partners in assessment of VPD outbreaks and in emergencies and prepare plan of actions for immunization of eligible children in emergency affected areas	WHO	
Afghanistan	Monitor	National & Subnational	Data	Improve systems and tools for generating evidence (monitoring vaccine safety and AEFI) and use of data for action	Strengthen vaccine/injection safety and AEFI surveillance by building the capacity of provincial technical committees (100 medical doctors) for detection, investigation and response vaccine side effects	WHO	
Afghanistan	Monitor	National & Subnational	Data	Strengthen evidence-based decision making for addressing population health needs and burden of diseases to improve procedures and practices for introducing new vaccines, assessment the effectiveness and the impact of vaccines introduced / used in public sector	WHO to continue its logistic support to MOPH by providing diagnostic kits, lab supplies/equipment, recording and reporting materials for Measles case-based, Rubella case-based, CRS case-based, Rotavirus, IBD, and intussusception surveillance for 9 hospitals and laboratories	WHO	
Afghanistan	Monitor	National & Subnational	Data	Strengthen evidence-based decision making for addressing population health needs and burden of diseases to improve procedures and practices for introducing new vaccines, assessment the effectiveness and the impact of vaccines introduced / used in public sector	Build the technical capacity of surveillance staff by training of 100 surveillance focal points at sub-national level, field visits, monitoring, regular review of VPD surveillance	WHO	\$ 809,024.86
Afghanistan	Reach	National	LMC	Coordination of RI issues particularly zero dose with BPHS/EPHS implementing partners through regular HSS related meeting, reviews, workshops, and quarterly, semi-annual and annual Sehatmandi review reports and comprehensive health system review	At HSS National Program Officer to support coordination between HSS, RI program, MoPH line departments, BPHS/EPHS implementing NGOs, other partners, and donors, with a special focus on the following: - Contribute to the quarterly, semi-annual, and annual performance review of BPHS/EPHS implementers - Contribute to the Full Portfolio Planning and development of PSR - Contribute to EPI coverage survey - Contribute to MDRS and facilitating the inclusion of immunization related indicators - Contribute to the introduction of COVID vaccine - Contribute to HSS/EPI related meeting, review and workshop	WHO	
Afghanistan	Reach	National	LMC	Provide technical support to MOPH and BPHS NCOs to focus on underserved and marginalized communities for reaching the unreached and under served population with huge number of zero dose children emphasizing on shifting the current "Reaching Every District" to "Reaching Every Community"	In close coordination with NIP and BPHS NGOs to conduct need assessment for planning refresher training courses on RI and facilitate training sessions; plan and conduct training courses on accelerated immunization activities, assist NIP in training of staff on Measles SIA; development of new vaccine; develop training materials on different aspects of RI including EVMA, EPI review, DQs, coverage survey and annual review of national immunization programs and conduct field monitoring	WHO	
Afghanistan	Reach	National	LMC	Strengthen evidence-based decision making for addressing population health needs and burden of diseases	Provide technical and logistic support to MOPH by joint monthly and annual plan of actions for strengthening VPD surveillance system at all level of health system by planning/implementing training, supportive supervision, field monitoring, conducting monthly review of VPD surveillance and reporting to all partners	WHO	
Afghanistan	Reach	National	LMC	Health services organizations is to timely plan for, acquire, link with the annual work-plan and use resources to maximize the efficiency of the organization.	Provide administrative/financial/technical support in planning, budgeting, managing, using of resources, controlling, accounting monitoring of correct using of fund and timely reporting to the relevant partners; facilitating EPI/VPD surveillance related training courses, workshops, EPI reviews, assessments, and monitoring of using funds at sub-national level.	WHO	
Afghanistan	Reach	National	LMC	Continuous functionalities of VPD surveillance labs, surveillance system and infrastructure by regular provision of lab reagents and supply through adequate planning, timely procurement and distribution to the labs and provinces	Assist in planning, budgeting, procurement, receiving and distribution of lab reagents, specimen collection kits, consumable supplies, equipment, recording and reporting materials for VPD surveillance; procurement of different items for RI programs and distribution to the labs and 34 provinces; and supporting NIP in VPD surveillance data entering; perform admin and finance support.	WHO	
Afghanistan	Leadership and Management Coordination (LMC)	National & Subnational	LMC	The main objective for the Acasus Phase III will be to deliver significant improvements in EPI coverage at the national level, able to be sustained by NEPI in the longer-term.	1) Drive further improvements in performance in the 17 provinces in which the program is already live. 2) Expand the program across the remaining 17 provinces. 3) Launch a pilot to monitor outreach performance in three provinces. 4) Strengthen performance management by creating new 'meeting facilitation manuals', and developing 'best practice' case studies on improvements delivered by managers. 5) Hardwire sustainability into the approach through progressively transferring responsibilities to NEPI teams, and through developing an LMC implementation manual' for EPI managers.	UNICEF	\$ 1,003,704.48
Afghanistan	Monitor	National	Financial/General Management	Management improvement and monitoring	11 NTA staff: Technical support to data, communication, HSS, cold chain, service delivery, surveillance, finance, coordination by NTAs to EPI programme through MoPH.	UNICEF	
Afghanistan	Reach	National	Supply Chain	Cold chain system strengthening	One staff at P3: Technical support to strengthen EPI supply and cold chain system	UNICEF	
Afghanistan	Advocate	National	Data	Data quality	One staff at P3: Technical support to improve quality of EPI data	UNICEF	
Afghanistan	Reach	National	Demand	Demand generation	One staff at NOB: Technical support to demand generation related interventions	UNICEF
