

Country	Investment Areas (select from dropdown)	Objectives (select from dropdown)	Activities (describe the activity)	Key Results (mandatory for multi-year activities)	Primary Partner (directly contracted organization)	Implementing Partner (primary partner or subcontractor # any)	MULTI-YEAR TOTAL
Kenya	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Provide technical assistance to NVIP to a) Develop strategies to reach zero dose children at national and county level b) Support counties prioritize service delivery strategies to priority groups and zero dose children c) Support new vaccine introduction activities at the national and county level	The technical assistance is expected to have plans, strategies for improving service delivery outcomes for new vaccine and HPV vaccines	CHAI	CHAI	\$ 150,000.00
Kenya	2. Human resources for health	2.1 Improve technical and managerial capacity of healthcare workers to plan, implement and monitor immunisation services	Provide technical assistance to NVIP at the national level to a) Develop strategic plans, Full portfolio plans, New vaccine introductions and other interventions b) Support managerial decision making through analytical support to the program through critical analysis, documentation and secretarial responsibilities where required.	Technical assistance will help NVIP improve in implementation of activities and plans.	CHAI	CHAI	
Kenya	3. Supply Chain	3.2 Improve stock management for vaccines and devices to avoid facility level stock-outs	Provide technical assistance to NVIP to a) Triangulate supply chain data and developed advanced analytics and dashboards b) Support NVIP utilize Charjo data and integration of Charjo data into NVIP repository c) Support NVIP and partners in implementing a data driven system redesign.	The technical assistance is expected to a) have charjo data integrated into the NVIP repository b) dashboards and supply chain analytics in use by the Logistics technical working group	CHAI	CHAI	
Kenya	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Strengthen the capacity of National and Subnational level immunization systems to increase and sustain high coverage and equitable utilization of vaccines with a special focus on zero dose communities and under-immunized populations by reinforcing effective and efficient integrated immunization service delivery mechanisms, addressing immunization bottlenecks, improving and leveraging private sector and community participation in immunization to reach zero dose communities, and implementing corrective actions for missed opportunities for vaccination	Reduced proportion of zero dose children in focus counties; increased private sector engagement on immunization services in focus counties. Targeted strategies and context specific activities to address bottlenecks at community level in focus counties. Targeted strategies and context specific activities to address bottlenecks at health facility level in focus counties	PATH	PATH	\$ 105,000.00
Kenya	2. Human resources for health	2.3 Ensure the immunisation health workforce is regularly supported by performance management systems, including supportive supervision and continuous professional development	Support NVIP in human resource capacity strengthening through supervision, mentorship and coaching. Integrate professional associations in providing technical updates through CPDs and CMEs.	Improved capacity of frontline healthworkers, increased vaccination coverage and reduced missed opportunities for vaccination in public and private health facilities	PATH	PATH	
Kenya	1. Service Delivery	1.7 Design and implement life-course immunisation approaches relevant to Gavi-supported vaccine programmes (HPV, MCV2)	Technical support to NVIP at national and sub national levels in strategies to improve uptake of life-course vaccines	Improved uptake of life-course vaccines, MCV2, HPV, RTS,S 4th dose and COVID-19.	PATH	PATH	
Kenya	3. Supply Chain	3.3 Increase capacity and quality of vaccine storage and distribution to improve vaccine availability, especially in the last mile	Provide Technical support to the National Immunization programme PMT to undertake the following: 1. Install, Commission and Conduct post installation assessment of cold chain equipment procured through various donors (Gavi, WB, GoJ and UNICEF resources) 2. Update the National cold chain inventory 3. Support the development of 2022 immunization supply chain and logistics operational plan (including data driven forecasting, stock management and monitoring and cold chain expansion activities) and implementation of the EVMA Improvement Plan	100% of target sites achieving readiness to receive cold chain (e.g. equipment on site, ready and w/ trained staff); National cold chain inventory updated timely	UNICEF	UNICEF	\$ 475,200.00
Kenya	7. Governance, Policy, Strategic Planning, and Programme Management	7.2 Strengthen programme performance monitoring and management systems at all levels	Provide Technical Assistance to the National Immunization Program to undertake the following: 1. Update, implement and monitor integrated county level micro-plans and tools with the equity lens aimed at identifying and reaching zero dose communities and children and addressing gender and equity barriers 2. Provide Technical support to the National Immunization programme to effective plan for and introduce new vaccines and vaccination campaigns including IPV2, Typhoid conjugate Vaccines, Malaria vaccines and measles rubella campaigns 3. Support development and implementation of policies aimed at screening for and bringing back missed children and communities into immunization at health facility and community levels with a focus on urban informal settlements, industrial and agricultural settlements, remote rural villages, nomadic and migrant communities. 4. Support development of policies supporting integration of routine immunization with COVID-19 vaccination and other primary health care services to improve efficiency with a focus on zero-dose and under immunized children and missed communities, including partnerships with private sector 5. Support the finalization of the Gavi Full Portfolio Planning Process	County level microplans and annual workplans updated; Policies on integration of Immunization, COVID-19 and Primary healthcare services developed; Gavi FPP Finalized	UNICEF	UNICEF	
Kenya	6. Demand Generation and Community Engagement	6.2 Design and implement social and behaviour change interventions	Provide Technical support to the National Immunization programme to undertake the following: 1. Scale up strategies to increase community engagement in immunization and increase their access to information through penetration of social networks and partnerships with religious and community leaders to boost public confidence, trust and demand for immunization 2. Implement evidence informed interventions aimed at increased acceptance, reduced vaccine hesitancy and refusals in new vaccines introductions and campaigns- HPV, Yellow Fever, Men A, Measles Rubella 3. Establish and/or strengthen online and offline social listening related interventions and identify platforms and digitalize RI messages to respond to community communication needs	Increased community awareness of and acceptance of vaccines	UNICEF	UNICEF	
Kenya	5. Vaccine Preventable Disease Surveillance	5.2 Increase timely detection of and response to vaccine-preventable disease outbreaks	Provide technical assistance to MOH at national and sub-national levels to attain and maintain the minimum surveillance core indicators for vaccine preventable diseases	VPD surveillance core indicators met and sustained	WHO	WHO	\$ 475,698.46
Kenya	1. Service Delivery	1.1 Extend immunisation services to reach zero-dose, underimmunised children and missed communities	Strengthen the capacity of counties and sub-counties to safely and efficiently deliver integrated immunization services through WHO field presence. WHO field teams will prioritize counties for support to promote evidence based decision making in order to reduce the number of under-immunized and zero dose children	County capacity built on vaccination services	WHO	WHO	
Kenya	4. Health Information Systems and Monitoring & Learning	4.1 Ensure timely, fit-for-purpose information is available at all levels of the system, and is used regularly and systematically to improve programmatic reach and performance	Provide technical assistance to MOH to improve data quality through promotion of culture on data generation, consumption and use		WHO	WHO	

Kenya	1. Service Delivery	1.2 Integrate delivery of services to improve efficiency, regularity and/or reliability of planned immunisation activities with a focus on zero-dose and underimmunised children and missed communities	Provide technical assistance to plan and introduce new vaccines as well as new vaccine formulations into routine immunization schedule: rotavirus switch, malaria vaccine, TCV	New vaccine/formulations introduced	WHO	WHO
