Liberia	Monitor	National & Subnational	Service Delivery	Support the County develop annual EPI Operational Plan focusing on improving low coverage in poor performing counties and districts	WHO		County annual EPI Operational Plan developed	County annual EPI Operational Plan developed			Operational plan developed and used to guide service delivery	
Liberia	Monitor	National & Subnational	Service Delivery	Monitor Rubella vaccine introduction a. Provide technical support for development of guidelines, SOPs and training b. Provide technical support for development of guidelines, SOPs and training c. Monitor the introduction of MR in the field and use lessons learned for future introduction and planning d. Support the preparation of the introduction and conduct of coverage survey after the MR campaign	WHO		Technical support provided for the testing of field conditions on the new vaccine introduction this includes information on safety practices to ensure strong mix and routine vaccination. Information on availability of vaccinators in health facilities is available for EPI national and sub-national managers and planners	MR vaccine fully introduced into the field and use lessons learned for future introduction and planning			MR vaccine fully introduced into the field and use lessons learned for future introduction and planning	
Liberia	Monitor	National & Subnational	Vaccine Specific Support	Support vaccine preventable disease (VPD) surveillance to identify and report cases to inform immunisation program planning, implementation, monitoring, and the regulation Support the development of surveillance systems and revision of surveillance guidelines	WHO		Vaccine preventable disease (VPD) surveillance supported. VPD cases are identified, reported and investigated to inform immunisation program planning, implementation, monitoring, and the regulation	Number of VPD cases identified, reported and investigated			Complete VPD surveillance system that can detect all VPD cases among all counties and districts	\$ 364,620
Liberia	Monitor	National & Subnational	Vaccine Specific Support	Support the institutionalization of Adverse events following immunization (AEFI) / AEFI to enhance reporting AEFI / AEFI to allow early detection of vaccine safety issues particularly with any new vaccine being introduced within a very short period of time. AEFI surveillance and response - Provide technical and logistic support for establishment, implementation and monitoring/evaluation of AEFI surveillance. Facilitate vaccine providers for AEFI surveillance reporting and feedback to clients. Support for national AEFI surveillance system across all counties including field visits to early reported cases. Support AEFI technical committee quarterly review meetings	WHO		Support provided for the institutionalization of Adverse events following immunization (AEFI) / AEFI surveillance to enhance surveillance systems and all reported AEFI cases were reported	Support provided to sustain the institutionalization of Adverse events following immunization (AEFI) / AEFI surveillance to enhance surveillance systems and all reported AEFI cases were reported	All health facilities have AEFI reporting forms for the reporting AEFI and have been trained on AEFI reporting		AEFI/AEFI activities are institutionalized at all health facilities	
Liberia	Advocate	National & Subnational	Human Resources for Health	National Immunization Technical Advisory Group (NITAG) - Provide technical and logistic support for establishment of NITAG. Train and provide technical and logistic support for coordination meetings - Support the NITAG members to attend the EPI quarterly Review meetings and field visit to PI activities	WHO		Provided technical and logistical support for establishment of NITAG. NITAG members are trained and supported for coordination meetings including for coordination meetings	Provided support to sustain NITAG members to attend the EPI quarterly review meetings and field visit to the PI activities and reports are available			NITAG established, members trained and functions operational	
Liberia	Monitor	National & Subnational	Human Resources for Health	TCV Innovation: Monitor the introduction of TCV in the field and use lessons learned for future introduction and planning Support the conduct of PI	WHO		Monitored the introduction of TCV in the field and use lessons learned for future introduction and planning - Report available	Provided support for the conduct of PI and report available for sharing	TCV introduced and supported provided for PI		TCV introduced and supported provided for PI	
Liberia	Identify	National & Subnational	Service Delivery	In close collaboration with EPI partners, support the development and implementation of the DIP	JIS		Validation by key stakeholders of tasks and guides for the DIP	DIP in field tested and validated by key stakeholders	DIP widely disseminated		Improved data accuracy and timeliness of reports submitted	
Liberia	Identify	National & Subnational	Service Delivery	Conduct results of field assessment through articles and grey literature for sharing of lessons learned	JIS		Detailed outline of document drafted	Draft document developed and reviewed	Document(s) submitted for publication		Results and lessons learned documented and disseminated with a global audience	\$ 284,624
Liberia	Monitor	National & Subnational	Financial/General Management	Support the preparation and analysis for the Comprehensive EPI Review	JIS		Draft analysis prepared for EPI review	Comprehensive EPI review complete, results documented and shared			EPI review complete with insight used for decision making and strategic planning	
Liberia	Identify	National & Subnational	Data	Final report for project on supporting Liberia's Data Transformation Plan	JIS		Results of field review, final report on all findings					
Liberia	Identify	National	Data	Support activities enhancing data integrity and use	USE OF GOLD		EPI Legacy data migrated if fully transferred B. Software app installed	Core team trained on planned digital data migration of app and how to use it Client team set up user			Various digital packages and apps supporting data analysis	\$ 22,951
Liberia	Reach	National	Supply Chain	Support and coordinate the temperature re-mapping of freezer room at central cold chain and also cold rooms at regional level. Re-mapping a. Update a temperature mapping protocol b. Carry out the temperature mapping activities c. Prepare a temperature mapping report d. Implement the recommendations by carrying out remedial actions e. Train device holders, system at Grand County Regional level f. Strengthen Cold Chain Logistics and Vaccine Management Practices g. Develop a system for equipment maintenance and build the capacity of county teams to develop preventive maintenance plans that will be regularly updated to reflect history of activities and observed service life h. Conduct regular maintenance visits (team supportive operations) to improve vaccine management, accountability, working best practices among others i. Support the implementation of the CDM implementation plan (based on findings of self assessment) j. Prior additional jobs and ensure they are posted and used in every health facility	UNICEF		1. Update temperature mapping protocol 2. Conduct the temperature mapping activities 3. Prepare the mapping report 4. Develop a system for maintenance 5. Develop supportive operations plan 6. Support the implementation of the CDM implementation plan (based on findings of self assessment) 7. All work planned and distributed to health facilities for use	1. Temperature re-mapping activities completed at all cold rooms (central and regional) and reports available 2. Remedial action taken based on the findings of the re-mapping 3. Implemented the preventive and corrective maintenance plan 4. Supportive operations completed and joint action plan developed for cold chain logistics and vaccine management improvement 5. All work planned and distributed to health facilities for use	1. Implement re-orientation following the finding of the re-mapping 2. Conduct regular training sessions at Grand County Regional level 3. Train the user jobs already 4. DMT reports and analysis are used for decision making		1. Zero months of stock-out of all vaccines in Montserrat 2. 100% of facilities report stock balances on a monthly basis in Montserrat 3. Strengthened National Logistics Working Group (NLWG) 4. Increased vaccine accountability in county level through regular reporting and monitoring of EPI	
Liberia	Reach	National	Supply Chain	Provide technical support for systems design with a focus on direct distribution of bulked vaccines in Montserrat County a. Review the National Logistics Working Group (NLWG) b. Review the NLWG meeting c. Organize regular meetings of the NLWG (Logistics only, review meeting) d. Roll-out the use of SMT at Lower Distribution levels e. Conduct capacity gap assessment of County Cold-chain officers	UNICEF		1. Preparation for direct distribution of vaccine and other supplies to facilities under the leadership of Montserrat County is completed 2. Improved direct distribution at Montserrat County 3. NLWG is rolled-out with revised TOR, annual plan and regular meetings	1. Report of Direct Distribution including results and lessons learned available 2. NLWG conduct review meeting and updated performance	1. Direct Distribution Strategy scaled up to at least one additional county based on lessons learned 2. Facility implement the annual work plan and establish or build practices		1. Zero months of stock-out of all vaccines in Montserrat 2. 100% of facilities report stock balances on a monthly basis in Montserrat 3. Strengthened National Logistics Working Group (NLWG) 4. Increased income	\$ 266,630
Liberia	Reach	National	Supply Chain	Provide technical support for the custom clearance of vaccine and cold-chain equipment including their distribution, installation and capacity building of all Montserrat EPI Logistic Officers on custom clearance procedures through the implementation of 1 Vaccine TA with UNICEF, The TA includes: a. Review the present document for completeness b. Identify the status of the equipment and supply of the vaccines using vaccine arrival report (VAM form)	UNICEF		1. All Vaccine and Cold Chain Equipment are cleared to transit across the port of entry 2. 100% of vaccines are received in UNICEF completed and shared with UNICEF Supply Division	Three National EPI Logistic Officers have the capacity to coordinate and register the custom clearance of vaccines and EPI Related Supplies Division	National Logistic Team is able to independently handle vaccine and supplies custom clearance procedures		100% of vaccines are cleared and installed supplies	
Liberia	Reach	National	Supply Chain	Clearance of vaccine and related supplies by third-party service provider	UNICEF		Timely clearance of vaccines and related supplies	Timely clearance of vaccines and related supplies			Timely clearance of vaccines and related supplies	
Liberia	Reach	Subnational	Service Delivery	1. Support for the implementation of evidence based approaches to improve coverage and equity a. Building capacity of County Health Teams to conduct equity analysis and develop improvement plans b. Contribute to the implementation of at least one equity improvement plan	UNICEF		1. Reports/Results of the 2020 Implementation of Equity Improvement Plans in 1 county available to inform scale-up	1. MCH capacity built to scale-up Equity Improvement Approach in 1 County	2. At least 1 county document the use of equity based approaches		100% of MCH and MCHV coverage increased by at least 10% following implementation of equity and coverage improvement plans
