

Country	Programmatic Area (2017)	Activity	Partner	Expected Outcome
Tajikistan	Country planning, management & monitoring	Support to programme management capacity	WHO	Efficient and timely implementation of programme activities
Tajikistan	Vaccine implementation	Support in decision-making for PCV and HPV vaccines introduction	WHO	MoH commitment to introduce PCV and HPV vaccines achieved
Tajikistan		Support to development of new vaccine introduction applications	WHO	New vaccine introduction applications submitted to Gavi
Tajikistan		Building capacity of NITAG	WHO	Strengthened NITAG capacity to make evidence-based recommendations
Tajikistan	Data	Provide continued TA and supply support for rotavirus sentinel surveillance and support to conduct case-control study for rotavirus disease	WHO	Policy and decision-makers have data on burden of rotavirus disease post-vaccine implementation and rotavirus vaccine effectiveness in older children
Tajikistan	Supply chain	Support to development of CCEOP application	WHO	Cold chain equipment needs addressed
Tajikistan		Technical assistance to develop CC equipment deployment plan	WHO	Cold chain equipment needs addressed in a prioritised manner
Tajikistan		Support to adopt vaccine management SOPs	WHO	Supply chain policy & guidance strengthened
Tajikistan	System Strengthening	Support to update AEFI guidelines	WHO	Administrative basis provided for AEFI surveillance system
Tajikistan		Support to conduct ToT training on updated AEFI guidelines	WHO	National team of ToT (incl. district level managers) trained
Tajikistan	Financial Management	Advocacy to create common understanding about immunisation financing / budgeting among all stakeholders involved in the budget development (EPI) and approval (MoH and MoF) activities.	UNICEF	Vaccine procurement budgeting process facilitated, increased understanding of the vaccine funding needs.
Tajikistan	Supply Chain and Vaccine Wastage, Data	Strengthening vaccine stock management system through capacity building on the use of supply data: 1) Develop training materials on using supply-chain data for decision making (including forecasting and micro-planning, implementation of SOP on supply chain data management at different levels (which is under development under 2016 PEF TCA) 2) Capacity building on the use of supply data (conducting training for national, oblast and district levels) 3) Capacity building on bottom-up forecasting / micro-planning at primary health care (PHC) level (conducting training for 500 PHC workers (in 10 out of 64 districts).	UNICEF	Supply data use capacity of regional / district EPI increased. Capacity of PHC workers on EPI forecasting / micro-planning improved.
Tajikistan		Assistance and support for rotavirus sentinel surveillance Development and implementation of resource mobilization plan	WHO
