

| Country | Programmatic Area (2017) | Activity | Partner | Expected Outcome |
|---------|--------------------------|--|---------|---|
| Uganda | Data | Uganda: continue implementation of data quality improvement plan | CDC | Increase staff skills and knowledge for district and health facility staff across the entire country of Uganda. Because of the focus on applied training at the point of service delivery, this will result in <u>sustainable</u> knowledge and practices for data. |

| Country | Programmatic Area (2017) | Activity | Partner | Expected Outcome |
|---------|--|--|---------|--|
| Uganda | Leadership Management and Coordination | Support the update of the cMYP | UNICEF | Increase staff skills and knowledge for district and health facility staff |
| Uganda | Leadership Management and Coordination | Promote south-south cooperation to promote mutual learning and long term partnership on improving vaccine management systems, cold chain, and LMIS | UNICEF | Learning from the high performing country incorporated in the national and sub-national priorities |
| Uganda | Country planning Management and Monitoring | Training DHT members and Health Subdistrict EPI focal persons in management and leadership for immunization and support supervision | UNICEF | Improved DHT management skills for planning, supervision, data utilization and decision making |
| Uganda | Country planning Management and Monitoring | Bi-annual review meetings with immunization district focal persons targeting 40 districts with inequities | UNICEF | Regular assessment of EPI performance to address identified gaps |

| Country | Programmatic Area (2017) | Activity | Partner | Expected Outcome |
|---------|--|--|---------|---|
| Uganda | Country planning Management and Monitoring | Support the implementation of Coverage and Equity recommendations through RED/REC strategy in 40 selected districts (20 UNICEF, 20 WHO) Monitoring of immunization performance at community level through conducting immunization status checks on infant cards | UNICEF | Reduction by 10% of unimmunized/under immunized children |
| Uganda | Supply chain and vaccine wastage | Support country to strengthen cold chain maintenance & repair of equipment and vaccine management through establishment of 14 regional cold chain preventive and maintenance teams and efficient management of vaccines/EPI supplies with emphasis on quantification, forecasting, Vaccine Tracking and Temperature Monitoring | UNICEF | Improved vaccine management practices and functionality of cold chain equipment in the 14 regions of Uganda |
| Uganda | Supply chain and vaccine wastage | Mentoring District Health Teams and Health Unit staff on the use, recording and the need for regular review of the 30day Temperature Monitoring Devices (TMD) | UNICEF | Increase cold chain management skills and knowledge for district and health facility staff |

| Country | Programmatic Area (2017) | Activity | Partner | Expected Outcome |
|---------|----------------------------------|--|---------|--|
| Uganda | Supply chain and vaccine wastage | Conduct EVM self assessment | UNICEF | EVM priorities are implemented supporting the country in making potent vaccines available and using resources efficiently. |
| Uganda | Supply chain and vaccine wastage | Print and distribute job aids to health facilities and health care providers on key EVM and cold chain maintenance tasks | UNICEF | Improved country vaccine management practices |
| Uganda | Supply chain and vaccine wastage | Develop requirements for vaccine eLMIS system and information to be included in the system Establish coordination of LMIS/MIS implementation considering the eHealth focus on integration | UNICEF | eLMIS/MIS implementation coordination structures set up |
| Uganda | Supply chain and vaccine wastage | Annual management performance review of District Cold Chain Assistants in all districts and recognition of best performers | UNICEF | Improved logistics management at district level |
| Uganda | Supply chain and vaccine wastage | Conduct a comprehensive HR for Immunization Supply Chain Management (HR for ISCM) assessment | UNICEF | An informed robust capacity development plan, including a training needs analysis |

| Country | Programmatic Area (2017) | Activity | Partner | Expected Outcome |
|---------|--------------------------|--|---------|---|
| Uganda | Financial management | Technical assistance to: a) Support the setting up of the Immunization Fund and its implementation as provided in Immunization Act (2016) b) Support development and implementation of resources mobilization framework to ensure financial sustainability c) Establish and operationalize mechanism for tracking and reporting immunization financing and expenditure. | UNICEF | Established mechanisms for immunization financial sustainability |
| Uganda | Demand genera | Updating of National EPI Communication Strategy and district level EPI communication plans based on recent Harvard Polling Study and equity assessment findings and recommendations | UNICEF | Improvements in immunization coverage are inclusive of the children in the most marginalized, remote and poorest communities and overall inequities within the immunization program are reduced |
| Uganda | Demand genera | Hold dialogue meetings with leaders of groups negative to immunization eg religious leaders, fishing communities, migrants/refugees from districts identified with high inequities | UNICEF | Improvements in immunization coverage are inclusive of the children in the most marginalized, remote and poorest communities and overall inequities within the immunization program are reduced |

| Country | Programmatic Area (2017) | Activity | Partner | Expected Outcome |
|---------|--------------------------|---|---------|---|
| Uganda | Demand genera | Review/finalisation, print and distribute communication materials on RI to include messages targeting high risk communities with inequities | UNICEF | Improved coverage of routine immunisation |
| Uganda | Data | Indepth assesment of EPI information management system | WHO | Improved EPI data quality |
| Uganda | Data | Develp National EPI Multi Year Data Quality Improvement Plan | WHO | Improved EPI data quality |
| Uganda | Data | Support the implementation and monitoring of the DQIP in collaboration with other partners” | WHO | Improved EPI data quality |
| Uganda | Data | Conduct data quality mentorship at health facility in a total district 50 districts in close collaboration with CDC | WHO | Improved EPI data quality |
| Uganda | Data | Build capacty of regional IDSR hub system | WHO | Improved EPI data quality |
| Uganda | Data | Technical support to the EPI laboratory | WHO | Timely detection, confirmation, reporting and response to VPD outbreaks |
| Uganda | Data | Technical support to the New Vaccine Sentinel sites including vaccine pharmacovigilance strengtening | WHO | Timely detection, confirmation, reporting and response to VPD outbreaks |

| Country | Programmatic Area (2017) | Activity | Partner | Expected Outcome |
|---------|--|---|---------|--|
| Uganda | Leadership Management and Coordination | Support districts in development of Annual workplan | WHO | District intergrated workplan |
| Uganda | Leadership Management and Coordination | Support development of 2016 JAR | WHO | |
| Uganda | Country planning Management and Monitoring | Support the implementation of equity and coverage recommendations through RED/REC | WHO | Increase staff skills and knowledge for district and health facility staff in at least 6 regions |
| Uganda | Country planning Management and Monitoring | Support the implementation of equity and coverage recommendations through RED/REC | WHO | Increase staff skills and knowledge for district and health facility staff in at least 6 regions |
| Uganda | Country planning Management and Monitoring | Support the implementation of Coverage and Equity recommendations through RED/REC | WHO | Increase staff skills and knowledge for district and health facility staff in at least 6 regions |

| Country | Programmatic Area (2017) | Activity | Partner | Expected Outcome |
|---------|--------------------------|---|---------|--|
| Uganda | Country planning | Support the implementation of Coverage and | WHO | Increase staff skills and knowledge for district and health facility staff in at least 6 regions |
| Uganda | Vaccine implementation | Support for NVI (proposal development, introduction and PIE) | WHO | Improved NVI and Implementation |
| Uganda | Vaccine implementation | Support functionality of UNITAG roles | WHO | Improved decision making process for EPI |
| Uganda | Vaccine implementation | Financial and Technical support for the implementation of polio transition plan | WHO | Sustainability of the EPI polio transition plan |
| Uganda | Financial management | Support setting up of the immunisation fund and the implementation as provided in the immunisation act 2016 | WHO | Structured immunisation fund framework in place |
| Uganda | Financial management | Establish mechanism for tracking and reporting immunisation fund and expenditure | WHO | Improved Technical, Accountability and Financial management of EPI funding |

| Country | Programmatic Area (2017) | Activity | Partner | Expected Outcome |
|---------|--------------------------|--|---------|--|
| Uganda | Data | Analysis of cholera data at the national and sub-national levels to identify and characterize hotspots for OCV use, and conduct monitoring and evaluation activities following deployment of OCV stockpile | CDC | Increased information on cholera burden data and applied to OCV introduction planning in India |
